**EVERGREEN ENGINEERING CONTINUES TO GROW;  
SIGNED EXPANSION LEASE FOR ADDITIONAL SQUARE FOOTAGE**

**(HILLSBORO, OR) April 23, 2008** – Within less than two years of relocating into an 8,617 sq ft office space at Technology Center One (located at the northwest corner of Evergreen Parkway and Cornelius Pass Road in Hillsboro), Evergreen Engineering has renewed its current lease and signed an expansion lease for an additional 5,700 sq ft of office space. Currently occupying the whole second level of the office building, Evergreen brings its expansion mode into the first level.

Two years ago today, the Hillsboro division employed 62 staff members. To date, Evergreen employs over 130 employees nationwide throughout its six offices. Its employee base is comprised of principals, professional engineers, architects, project managers, construction managers, designers, drafters, and administrative personnel; 85% hold college degrees, 10% hold advanced degrees.

“We have experienced remarkable growth in recent years,” stated Todd Alsdorf, Managing Principal of Evergreen Engineering’s Clean Manufacturing Division. “Soon after we moved into this building, we quickly outgrew it and looked into additional office space. We’re excited about the expansion since it will provide our staff the extra space to work efficiently as well as provide added conference rooms.”

Construction and remodeling has commenced, and Evergreen expects to shift some of its staff to the first floor by mid-May 2008.

Established in 1985, Evergreen Engineering is an architectural, engineering, and construction firm serving various industries such as bioscience, clean manufacturing, forest products, industrial manufacturing, light industrial, metals, microelectronics, semiconductor, and solar. Evergreen has a reputation of listening to clients’ objectives and being able to do projects other firms consider too difficult or impossible. Evergreen has offices in Eugene, OR; Hillsboro, OR; Santa Clara, CA; Boise, ID; Albany, NY; and Atlanta, GA with clients throughout the United States and Canada.
